

PREPME.COM

PrepMe Fact Sheet

What is PrepMe.com?

We're an online test prep company that wants to help YOU prepare for the SAT. The best part: for FREE!

How many hours of content?

PrepMe offers over 60 hours of content, including lessons, quizzes, and practice tests. With 2-3 hours of work per week, you can expect to make huge score improvements.

What is the average score improvement?

A recent survey found that students average approximately a 305 point score increase.

What makes us different?

Unlike traditional test prep courses, PrepMe creates a customized lesson plan for each student. Through an initial diagnostic test, our course evaluates each student's specific strengths and weaknesses across up to 100 predefined SAT skill areas. Based off of these results, our program creates a tailored schedule to maximize your test prep time.

Who else uses us?

We currently have over 38,000 students. We are working with 35% of libraries in CT, several charter schools and nonprofits, and thousands of regularly-enrolled students.

How can you start?

In a special partnership with the state of Maine, PrepMe has decided to give free access to their SAT Gold course package (retailed \$299) to all public HS juniors. Talk to your guidance counselor, receive login information, and then begin. It's that simple. If you have any questions, email us at support@prepme.com.

"What I loved most about the PrepMe SAT program is that really everyone can do it. No matter what question you have, there is a resource to answer it."
